

WHY ECO-CREDITS™?

The Eco-Credit™ is designed for businesses and farms to directly reduce our collective carbon footprint. Through the Eco-Credit™ ORICoop aims to improve the advocacy to practice regenerative land management that increases carbon and ecological health into farmland over time.

Eco-Credits enable businesses and farms to mutually benefit each other by a direct carbon offset. Enabling better market opportunities, shorter supply chains and best practice knowledge around carbon neutrality and healthy farm systems.

An ecological and farmer driven market instrument that offers a pathway to a stronger, sustainable and more robust organic and regenerative farming industry. That is empowered to withstand existing market pressures on farm production systems, together with diversified, measured and beneficial outcomes.

Demonstrated by transparent supply chains, increased food security, reliable on-farm market data, and a transparency that enables farmers to be rewarded for their work with full supply chain and business footprint knowledge and traceability.

REDUCE

Measure your current emissions and take active steps to reduce them.

OFFSET

Offset the balance via the purchase of an Eco-credit™

ASSUMPTION → 1 ECO-CREDIT = 1 TONNE CO_{2-e}

VERIFY

With targeted incentives that relate directly to ecological benefits of the soil, land, biodiversity and water systems. Eco-Credits™ provide measurable outcomes of land stewardship in terms of nature, wildlife, animals, land sustainability and long term ecological preservation and restoration

TRACEABILITY

Through farm to end consumer supply chain transparency, consumers are able to fully understand the whole carbon footprint ecosystem.

THE VISION:

To strengthen our food and farming communities we need to connect them more closely. Working towards long term adaptation and adoption of best practice for regeneration of farmland, ecological systems, communities and our food system.

THIS INCLUDES:

- *Vitalise capital to connect business, food and farming for long term sustainable outcomes*
- *Improve farmers capacity to capture the value of natural capital in their farming systems*
- *Empower businesses to achieve carbon neutrality and long term sustainability*

An exchange of Eco-Credits™ provides a credible and definable mechanism that connects our carbon footprint from business to farmers for long term and direct co-benefit to farmers and the land.

INCREASES IN:

ECO-CREDIT + APPROVED CREDITS = NATURAL ECOSYSTEM BENEFIT

OUTCOMES OF ECO-CREDITS

Eco-Credits enable conscious businesses to offset their carbon footprint directly with organic farmers. Eco-Credit™ commitments include increasing the amount of carbon stored in the soil and improving the area and quality of biodiversity across each farm ecological system.

Each Eco-Credit™ beneficiary is assured of these outcomes via the Annual Report including:

- Verified soil carbon increase
- Biodiversity quality and increase
- Ecological verification including birds, insects, wildlife & water quality
- Tree planting evidence
- Eco-Credits™ are only retired once

ECO-CREDIT APPLICATION

On the application, insert the number of Eco-Credits you wish to apply for.

Eco-Credit applications must be in the name(s) of the business seeking the offset, company or other legal entities acceptable to the Company up to a maximum of two names per application.
